INDEX

Expt. No	Experiment Title	Page No
2	1. Create an HTML page with a list of items, a few buttons and some paragraphs. 2. Develop JavaScript Solutions for the Given Requirements: a. Change the background color of an element by its id. b. Change the text color of all list items ( ) to blue. c. Change the text of all buttons to "Clicked!" when clicked. d. Increase the font size of all paragraphs. e. Select the first element with a specific class and change its text.	

Experiment 2

1. Create an HTML page with a list of items, a few buttons and some paragraphs.
2. Develop JavaScript Solutions for the Given Requirements:
    a. Change the background color of an element by its id.
    b. Change the text color of all list items (<li>) to blue.
    c. Change the text of all buttons to "Clicked!" when clicked.
    d. Increase the font size of all paragraphs.
    e. Select the first element with a specific class and change its text.

Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>DOM Manipulation Example</title>

  <style>
    #myBox {
      background-color: yellow;
      padding: 20px;
      margin-bottom: 20px;
    }

    li {
      margin: 5px;
    }

    button {
      padding: 10px;
      margin: 5px;
    }

    p {
      color: green;
    }

    .special {
      font-weight: bold;
      color: purple;
    }
  </style>
</head>

<body>

  <div id="myBox">My Box</div>
  <ul>
    <li>Item 1</li>
    <li>Item 2</li>
    <li>Item 3</li>
    <li>Item 4</li>
  </ul>
```

```
  <button>Button 1</button>
  <button>Button 2</button>

  <p>Paragraph 1</p>
  <p>Paragraph 2</p>
  <p>
  This is a simple webpage demonstrating DOM manipulation using JavaScript.
  It contains a list, buttons, and paragraphs that can be modified dynamically.
</p>

  <div class="special">Original Text</div>

  <script>
    document.getElementById("myBox").style.backgroundColor = "lightblue";

    let items = document.getElementsByTagName("li");
    for (let item of items) {
      item.style.color = "blue";
    }

    let buttons = document.getElementsByTagName("button");
    for (let btn of buttons) {
      btn.addEventListener("click", function() {
        btn.textContent = "Clicked!";
      });
    }

    let para = document.getElementsByTagName("p");
    for (let p of para) {
      p.style.fontSize = "20px";
    }

    document.querySelector(".special").textContent = "Changed Text";
  </script>

</body>
</html>
```
